

# **U.S. Consumer Product Safety Commission**

## **LOG OF MEETING**

**SUBJECT:** F15.11 Expansion Gates and Expandable Enclosures Warning Labels Task Group

**DATE OF MEETING:** 24 August 2022

**LOG ENTRY SOURCE:** Carlos Torres, ESMC

**LOCATION:** Virtual/Teleconference

**CPSC ATTENDEE(S):** Carlos Torres, ESMC; Matthew Kresse, LSM, Susan Proper, EC

**NON-CPSC ATTENDEE(S):** Steven Anzaroot, Task Group (TG) Lead; please contact ASTM for the full list of participants.

### **SUMMARY OF MEETING:**

This Task Group (TG) meeting was to revise and add clarification to the language in the standard that pertains to the wall cups warning label be a separate warning label. The TG lead started the conversation presenting the current language in the standard and the sections where the language is confusing. The TG members and CPSC staff agreed that the wall cups warning label shall be separate on the product, as it currently states in the standard, but need not to be necessarily separate in the package or in the instructions. The group agreed to add a note to the wall cups warning label requirement stating that the warning may not need to be separate in the package or in the instructions.

### **NEXT STEPS:**

The proposed note will be drafted and balloted before the next Subcommittee meeting in October 2022.
